13.158: ITA-991-(82)-8

### CURRENT INDUSTRIAL REPORTS

Titanium Ingot, Mill Products, and Castings

1982

NOV 24

U.S. Department of Commerce BUREAU OF THE CENSUS BUREAU OF INDUSTRIAL ECONOMICS AUGUST 1982

ITA-991 (82)-8 Issued November 1982

August from (2.4 million pounds in July, Total shipments of framium earlies for August amounted to 35 thousand pounds. A description of the survey methodology and related information may be found in the January 1982 report for this series, ITA-991 (82)-1, issued June 1982.

The total production of titanium ingot for August was 3.3 million pounds. This represented an 18-percent increase from the July total of 3.3 million pounds. Consumption of titanium ingot increased by 18-percent in August to 3.7 million pounds from 3.1 million pounds in July. Net shipments of titanium mill products decreased by 2 percent to 2.3 million pounds in

Table 1. NET SHIPMENTS OF TITANIUM MILL PRODUCTS

(Thousands of pounds)

(Indudated of position)				
Product	August 1982	July 1982	August 1981	
Total <sup>1</sup>		2,382	3,833	
Sheet and strip		( <sup>2</sup> )	(2)	
Plate Forging and extrusion billet	1,155	1,286	2,127	
Rod and bar		273	492	
Fastener stock and wire	. 35	34	91	
Extrusion	910	880	1,353	

<sup>1</sup>Net shipments, total, is the sum of mill product shipments plus mill products consumed in the manufacture of fabricated products, less total receipts. Met shipments for each mill product category also includes the consumption of mill products in that category in the manufacture of other mill products. Detail not add to the total because of this difference in definition.

Data for sheet and strip, plate, extrusion (other than tubing), pipe and tubing, and other have been combined to avoid disclosing individual company data.

1See table 1 for more detailed data.

2Net shipments, total, is the sum of mill product shipments plus mill products consumed in the manufacture of fabricated products, less total receipts. Net shipments for each mill product category also includes the consumption of mill products in that category in the manufacture of other mill products. Detail does not add to the total because of this difference in definition.

Address inquiries concerning these figures to the U.S. Department of Commerce, Bureau of Industrial Economics, Materials Division, Washington, D.C. 20230, or to the Bureau of the Census, Industry Division, Washington, D.C. 20233, or call Nathaniel A Shelton, (301) 763-2529.

For sale by Data User Services Division, Customer Services (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price, S.1.00 per copy, \$13.50 per year.

<sup>1</sup> For a comparison of Standard Industrial Classification (SIC) codes, export (Schedule B) codes, and import (TSUSA) codes, please refer to the January

report for this aeries, 17A 991(82)-1, issued June 1982.

Source: Bureau of the Census report BY 546, U.S. Exports-Schedule B--Commodity by Country.

These values were derived by use of adjustment factors to exclude freight, insurance, and other charges incurred in moving goods to the port of export. This adjustment is made to convert the values to an approximation of the producers' value of exported goods. Current adjustment factors are based on data of right of Exports of Manufactured Products, MBOIAGE, appendix B. Comparable adjustment factors for earlier years are based on asternity factors are found 1972. The current adjustment factor has producted for 1970 which are published in Origin of Exports of Manufactured Products, MBOIAGE, appendix B. Comparable adjustment factors for earlier years are based on astillar factors developed For 1971 and 1972. The current adjustment factor has provided for 1971 and 1972. The current adjustment factors are to 1971 in Source: Bureau of the Census report IM 185-X, U.S. Imports for Consumption and General leports.

"The value includes c.i. r (cost, issuamance, and freight) at the first port of entry in United Holled States plus U.S. import duties and other charges to

the import point.
\*\*Apparet consumption is derived by subtracting exports from the total of set shipments plus imports.
\*\*Apparet consumption is derived by subtracting exports from tings and tings and import classifications for import and tings and import classifications for import and tings and import classifications for imports or imports or import and report in the output codes. # COUNTY BUSINESS PATTERNS 1980

# Now Available

## 1980 Data on Employment, Pavrolls & Establishments

County Business Patterns presents intercensal data on employment, number and employment size of establishments, and payrolls, by 2-, 3-, and 4-digit levels of the Standard Industrial Classification (SIC), for States and counties. This annual series includes a separate paperbound report for the United States, each State, the District of Columbia, and Puerto Rico.

The individual State reports present, for the State, number of establishments, employment, and payroll data by employment-size class to the 4-digit SIC level. Also included, by major industry group, are data on the number of establishments with 1,000 or more employees, by employment-size class.

The U. S. Summary includes data by detailed industry (4-digit SIC) level for the United States. For the United States, number of establishments, employment, and payroll data are also provided by employment-size class

to the 4-digit SIC level. Also included, by major industry group, are data on the number of establishments, employees, and payroll of administrative and auxillary establishments.

CBP is a standard reference source of small-area data for business persons, market researchers, and industrial and civic planners.

CBP data are especially useful for:

Analyzing market potentials
Determining location and size of sales
territories

Establishing sales quotas and advertising budgets

Locating production, marketing, and service facilities.

CBP data are shown in detail for the following broad industry categories: Agricultural services, forestry, and fisheries Mining

Contract construction

Manufacturing

Transportation and other public utilities
Wholesale trade

Retail trade

Finance, insurance, and real estate Services

#### **Data in Other Formats**

Published CBP data, by county and by industry, will be available at cost, on computer tapes. Inquiries should be addressed to Chief, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

The reports described in this announcement are also available on microfiche. For further information, contact: Data User Services Division, Customer Services (Microfiche), Bureau of the Census, Washington, D.C. 20233.

For a descriptive order form listing all available titles and prices, fill in the request below, and mail to the address shown.
